

Dear Sarah

This is just to let you know that the rewiring project carried out by Graham Smith CES Ecclesiastical Electrical at St Mary Kippington has been completed and a month ahead of schedule. We have a final handover meeting with Graham next week and a wooden cabinet is to be made for the touch screen, which will finally see the project through.

CES were unquestionably the right company to carry out the total rewiring of our beautiful church. This we felt right from the start as they seemed to be in a league of their own.

They have transformed St Mary Kippington, from a beautiful but dark rather unwelcoming listed building, to an amazing and spiritually warm place to be in with some features now visible that members of the congregation had never noticed before. The church now looks so wonderful and welcoming and will I am confident will be appreciated by future generations for worship and concerts.

The CES working team were totally committed and were a pleasure to work with. Nothing was too much trouble and the foreman came out one weekend very willingly just before Christmas to rectify a problem. They always kept us informed and worked well as a team and with a good deal of respect for the building they were working in.

Full marks to CES and Graham Smith.

I would recommend the company whole-heartedly to anyone embarking on a similar project.

Finally, are there others who I should inform about completion of the project or is that automatic now I have informed you?

Best wishes
Rosemary Creed
