Dear Stephen,

We are just approaching the end of the lighting installation at St Peter's, and will shortly be returning the Faculty forms to you.

I write to comment on the high standard of workmanship that CES have provided. Their electricians have accommodated our requests for the church to be used on a couple of midweek occasions during the installation, and have left the church safe and clean for us to use on the 3 weekends that fell into the period of installation.

Graham Smith spent 2 hours with a group of us last night showing us how to program the various 'scenes', and he has been available to answer our questions or comments throughout the installation period.

I would wholeheartedly recommend CES to anyone considering a lighting installation.

Yours,
Mick
